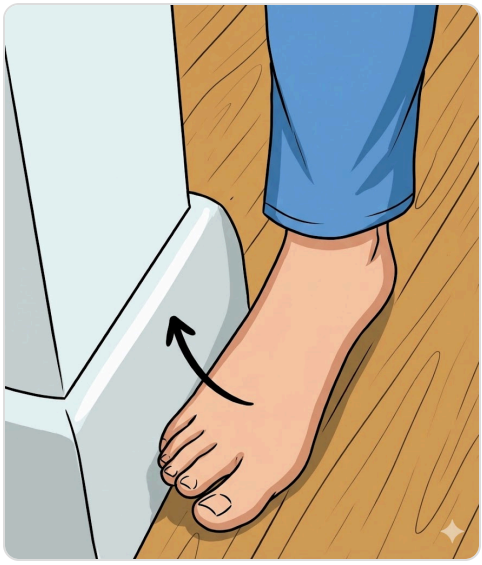
HOME EXERCISE PROGRAM

Personalized Recovery Plan

SINGLE LEG STANCE

Have a sturdy chair or countertop to hold on to. Start by standing with both feet on the ground. Lift your uninjured foot up while holding onto the chair. Hold this position for 10-15s. If this is too easy progress to holding with one hand, to one finger and to no hands for 10-15s. Repeat this for 10 reps x 3 sets.



ANKLE EVERSION ISOMETRIC

Push the outer portion of your injured foot/ankle against the corner of a wall. Steady yourself sitting on a chair. Ensure your knee and hip are not moving and there is no pain on your ankle. Hold the tension against the wall for 10-15s. Repeat 10 reps x 3 sets.

ANKLE CIRCLES (ROM)

Dangle your ankle off the ground then proceed to move it in a clockwise fashion for 10 reps then move it in a counterclockwise fashion. Ensure there is no pain with the movement. Repeat this exercise for 3 sets each leg (30 times each).

Ankle Protocol:
- Frequency: 1-2x Daily
- Sets/Reps: 3 sets of 10
- Keep pain below 3/10.
