HOME EXERCISE PROGRAM

Personalized Recovery Plan

STANDING HIP ABDUCTION WITH BAND

Tie the exercise band around your ankles. Stand on the side of a sturdy chair. Lift the outside leg away from the inner leg until some tension is felt. Do not bend your waist and ensure your shoulders are squared. Repeat this for 10 reps x 3 sets before changing sides.

STANDING KNEE BENDS WITH BANDS

Place a sturdy chair in front of you for safety. Tie the exercise band around your ankle. Hold onto the top of the chair. Proceed to gently bring your heels to your glutes as far as you can without pain and slowly return them to the floor. Repeat 10 reps x 3 sets.

STANDING HIP FLEXION WITH BANDS

Tie the band around your feet. Stand behind a sturdy chair, and slowly raise each knee towards your chest before alternating. Repeat 10 reps x 3 sets.

These exercises are intended to be the most basic and equipment-free exercises to help current movement dysfunction, please try to perform daily and consult a physician if the exercise worsens your pain and function significantly.
