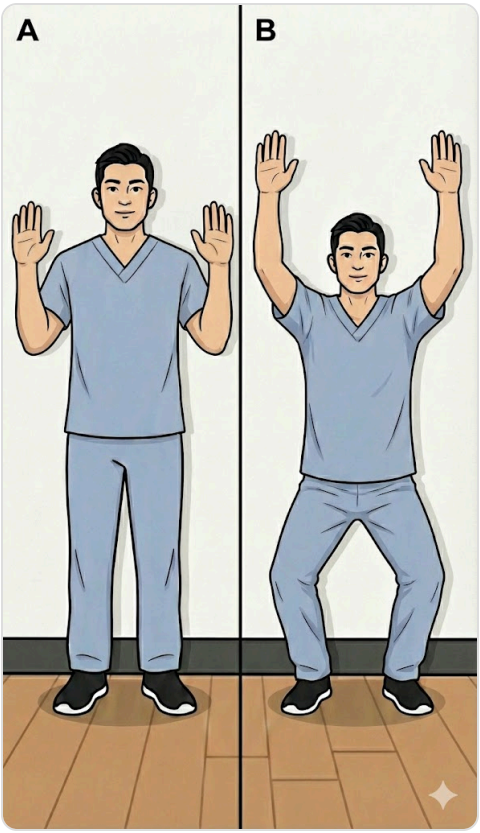
HOME EXERCISE PROGRAM

Personalized Recovery Plan

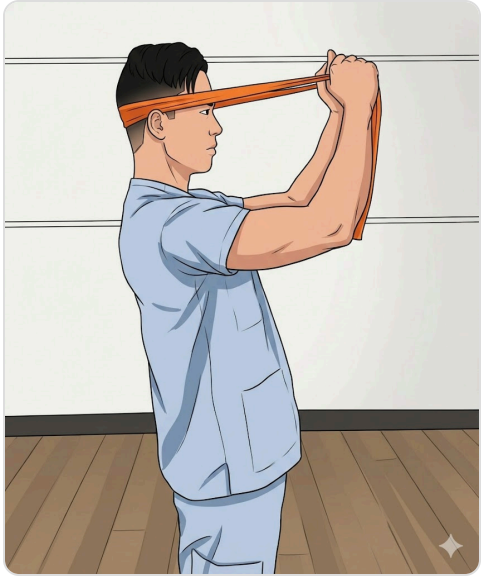
DEEP NECK EXTENSION

Starting position: Start on your hands and knees. Gently tuck your chin in and slowly lift your head backwards so it comes to the level of your spine. Then gently return to the starting position. Repeat this 10 reps x 3 sets.



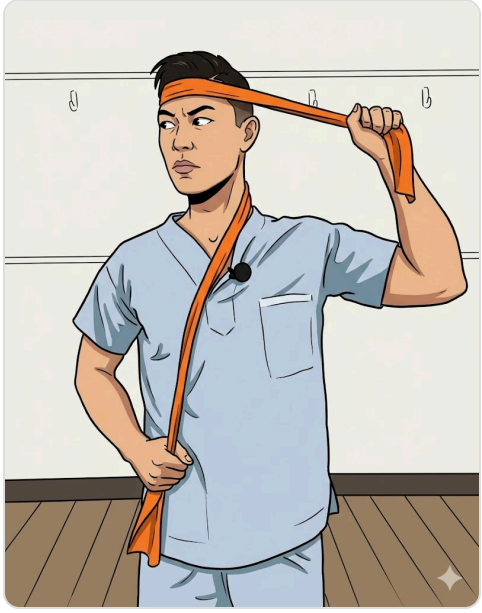
NECK SIDE FLEXION WITH RESISTANCE BAND

Wrap the exercise band around the right side of your head. Hold the ends of the band with your left hand and lift your elbow and shoulder around 90 degrees. Then tilt your right head towards the right shoulder. Create some resistance with your left hand by pulling on the band. Ensure there is no pain felt. Hold contraction for 3s then return back to the starting position. Repeat this on the left side of your head, holding the band with your right hand. Repeat this for 10 reps x 3 sets.



DEEP NECK FLEXION WITH RESISTANCE BAND

Wrap the exercise band around the back of your head. Have your elbows at 90 degrees and the ends of the bands by your head. Tuck your chin slightly and extend your elbows until there is some tension around your neck. Hold for 3s and then slowly return to the starting position. Repeat 10 reps x 3 sets.



NECK ROTATION WITH RESISTANCE BAND

Left rotation: Wrap the exercise band around your head and one end with your right hand with the elbow and shoulder around 90 degrees. Hold the other end of the band with your left hand by your waist. Pull on the band with both hands to create some tension and then rotate your head towards the left till there is some muscle contraction felt. Ensure no pain and hold for 3s. Return slowly to the starting position. Repeat 10 reps x 3 sets. For right rotation change hands with left hand holding the band up and the right hand holding the band by the waist.

These exercises are intended to be the most basic and equipment-free exercises to help current movement dysfunction, please try to perform daily and consult a physician if the exercise worsens your pain and function significantly.
